

**Flood damage restoration of
Minor Irrigation Projects**

Due to heavy rainfall, massive deforestation and unchecked jhum cultivation, flash floods have become a regular feature in the state. As a result of inundation of banks in the foothills, the flood water carries huge amount of hill sand, logs and trees and deposits of silt occur in the agricultural fields and in the upstream of dams, thus washing away embankments, causing immense damage to weirs / barrages, canals and cultivable lands. Hence the need for flood damage restoration works.

HEAD OF ACCOUNT : 2702 - Flood Damage Repair of MIPs

(Rs. in Lakhs)

SI no.	Name of Project	Sanctioned Amount (Rs.)	Total Expenditure upto March 2009	Expdr. during 2009-10 (Rs.)	Total Expdr. upto March 2010 (Rs.)	Spillover Progress upto March 2010	Physical Progress upto March 2010 (%)
